PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building and maintaining web applications for international clients. Experienced across frontend and backend, with a strong focus on integrations, performance, and reliable delivery. Comfortable collaborating in team environments and contributing to the full development lifecycle, from implementation to deployment.

WORK EXPERIENCE

Full Stack Developer - Qordev

2025 - Present | Remote (U.S. Clients)

- Developed and maintained a web platform, improving performance, reliability, and overall user experience.
- Contributed to a full UI rebuild that increased user engagement and retention.
- Designed and implemented backend services for dashboards, payments, authentication, and external services.
- Implemented CI/CD pipelines using Docker and GitHub Actions, improving deployment speed and release reliability.
- Optimized cloud infrastructure to enhance system performance and stability.

Tech Stack: React, Next.js, Laravel, TypeScript, AWS, Docker, GitHub Actions

Software Engineer - Ahinko International

2020 - 2025 | Remote (U.S. Clients)

- Developed and maintained CRM systems, WordPress platforms, and web applications for multiple clients.
- Built and integrated third-party services including SMS, referral systems, and other APIs.
- Optimized application performance, improving load times and user experience.
- Contributed to scalable features and improved system reliability.
- Collaborated with team members and stakeholders to deliver business-aligned solutions.

Tech Stack: JavaScript (Node.js, React), PHP (Laravel, WordPress), MySQL, Google Cloud, SASS, Express

Freelance Web Developer - Independent

2017 - Present

- Developed and maintained websites and custom solutions for automotive and SME clients.
- Built and customized WordPress sites and plugins to improve digital presence and lead generation.
- Created web applications with modern frameworks to enhance performance and user experience.
- Managed project delivery, quality, hosting migrations, and virtual-machine transitions.

Tech Stack: WordPress, PHP, JavaScript, React, Vue, Astro, Node.js

Graphic Designer and Frontend Developer - Stylus Magazine

2017 - 2018

- Delivered digital and print materials with cross-functional teams.
- Developed an internal tool to improve inventory tracking and reduce manual errors.
- Contributed to UI design and layout improvements for content delivery.

Tech Stack: HTML, CSS, JavaScript, UI Design

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, Next.js
